

# Parent comments from Animation Gets Real Miami 2017

## What I liked best about the program:

*The program kept my son motivated and stress-free. It's incredible how the program helped these kids feel like equals to others and a part of something that accepts their differences and does not exclude them. Thank you.*

*The fact that it gives children with disabilities the opportunity to learn.*

*Seeing my son light up, be proud, and get encouraged to pursue his talents. Thank you from the bottom of my heart!*

*I like the opportunity to explore and try something that he could have as a career.*

*I love the combination of the arts and technology.*

*I love the inclusive nature and supervision.*

*This course helped my child come out of his shell somewhat and become a little more social. That my child did come to your program and at first didn't feel like coming but I made it where he had to come and follow through. All he did and learned I'm very proud of what Jin learned and accomplished. The staff was awesomely great they helped Jin come out of his shell and learned to be more social and tolerant toward others. Also the staff was great, I am totally grateful for all they did with Jin and now he wants to continue with more of this course. Thank you so much hope to see you next year in Miami if you do the seminar here at FIU again.*

*Has given Michael a creative outlet in something that he was already interested in and given him a lot of motivation to learn more.*

*Opportunities for my child to learn something he likes.*

*Good opportunity for my child to learn animation.*

*Best was the high quality of the teachers.*
